- Python
- Unity
- Unreal Engine
- Git / GitHub
- CI/CD
- Jenkins
- IT Support
- Agile / Jira

Education

Bachelor of Science in Computer Games Technology

Solent University, Southampton, UK

2020 – 2024

First Class Honours

Relevant Coursework:

- Implementing Gameplay Systems.
- Graphics Programming.
- Networked Game for Final Major Project.

Certificate of Higher Education in IT Systems Programming & Management Technician

Escola Secundária Dom Manuel Martins, Setúbal, Portugal

2014 – 2017

Relevant Coursework:

- Hardware assembly and network configuration.
- Developing custom software solutions for various applications, such as calculating student final grades.

Experience

Co-founder & Gameplay Programmer — ***Thunder Blossom Games***

2022 – 2024

- Developed and released four games using Unreal Engine and Unity, building gameplay systems and improving development workflows.
- Automated Jenkins builds, saving up to eight hours of manual work per build.
- Coordinated teams of 6–10 developers and allocated tasks across projects.
- Used Jira, Kanban and Agile practices to organise and track development.

University Labs Supervisor ***Solent University***

2020 – 2024

- Supervised two floors with 6-7 labs, ensuring a clean and organized environment for students during after-hours use.
- Enforced closing times and maintained facility standards to support productive learning spaces.

Senior Team Member **Bunsik**

2026 – Present

- Supervise restaurant shifts, delegate tasks and coordinate teams of up to five employees.
- Resolve customer complaints independently and maintain service standards.
- Complete opening and closing checks, including HACCP and safety documentation.

Crew Member **Slim Chickens**

2022 – 2026

- Supported opening and closing operations in a high-volume restaurant serving up to 2,000 guests weekly.
- Trained new colleagues and maintained food safety and cleanliness standards.

Computer Repair Technician ***IT. POWERON***

2016 – 2017

- Repaired and maintained 2 to 3 computers per week, ensuring reliable operation for clients.
- Provided on-site support for Point-of-Sale systems, resolving technical issues to minimize downtime.
- Assisted clients with tailored hardware recommendations and upgrades to meet operational needs.

Technical Projects & Interests

Vestige Toolkit: Developing a Windows desktop tool in C#/.NET to explore and manage game server and client data.
Tolling Tide: Developing gameplay systems for a Unity fishing roguelite.
Game Jams: Build and prototype gameplay mechanics under tight deadlines.
